DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Frank Cire on September 26, 2005.

The application has been amended as follows:

IN THE CLAIMS:

1. to 4. (Canceled)

5. (Currently amended) A printer apparatus ~~according to Claim 1~~, comprising:
detection means for detecting an interface-disconnection state; and
control means for performing control processing in which, when said detection
means detects the interface-disconnection state during a printing process, the printing is
terminated and paper is discharged.

Art Unit: 2622

wherein said control means determines, in accordance with the type of paper used for printing, whether or not control processing is performed in response to the detection of the interface-disconnection state by said detection means.

6. to 14. (Canceled)

15. (Currently amended) A method ~~according to Claim 11,~~ for controlling a printer apparatus, comprising:

a detection step for detecting an interface-disconnection state during a printing process; and

a control step for performing control processing in which, when said detection step detects the interface-disconnection state during the printing process, the printing is terminated and paper is discharged,

wherein said control step determines, in accordance with the type of paper used for printing, whether or not control processing is performed in response to the detection of the interface-disconnection state by said detection step.

16. to 24. (Canceled)

25. A control program stored on a recording medium ~~according to Claim 21,~~
readable by a computer provided in a printer apparatus, said control program comprising:

Art Unit: 2622

a detection step for detecting an interface-disconnection state during a printing process; and

a control step for performing control processing in which, when said detection step detects the interface-disconnection state during the printing process, the printing is terminated and paper is discharged,

wherein said control step determines, in accordance with the type of paper used for printing, whether or not control processing is performed in response to the detection of the interface-disconnection state by said detection step.

26. to 39. (Canceled)

Art Unit: 2622

Allowable Subject Matter

2. Claims 5, 15 and 25 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art and the prior art of record, specifically Oyanagi does not teach or suggest whether or not control processing is performed in accordance with the type of paper used for printing when detection means detects interface –disconnection state.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
